Subject: ALC Question for special meeting February 4th

Good Evening:

Kindly submit the following to be addressed at the special meeting February 4th regarding the Algonquin Land Claim and the Mattawa River Provincial Park.

I support a fair and reasonable settlement to the land claim and understand a transfer of land parcels should be part of the settlement, and this can be accomplished without changing the protected status of a regulated provincial park. My question is why is a portion of the Mattawa River Provincial Park still being considered for disposition and development when the consultation and planning for the Lands for Life / Living Legacy process clearly designated this as a protected area for important ecological and social reasons and the sensitivity of this protected park is even more significant now than when the decision to protect it was finalized?
