Subject: Fwd: TLCA has 'concerns' over City's Trout Lake study - North Bay News

Rick and Shirley Ferron are sending you this link of Bay Today's article relating the concerns of the TLCA of the protection of our Trout Lake drinking water supply!!

It is imperative that East Ferris Municipality continue their strong stringent policies already in place to protect our Trout Lake Drinking Water!! This lacking Water study encourages East Ferris to change their policies and allow unprecedented development on Trout Lake. It is because of East Ferris's already existing policies and prudent gradual development that Trout Lake is in the condition it is in and we MUST keep it that way!! We implore you to reject this study and continue the protective policies you presently are implementing to maintain our Trout Lake drinking water at it's best! Please share this with all council members at your Council meeting!!
